

PRESS RELEASE

YAMAWA EUROPE AT AMB: FOCUS ON GERMAN INDUSTRY.

Stuttgart, 13-17 September 2016 – Yamawa Europe, the European subsidiary of Yamawa – a leading Japanese manufacturer of high performance threading tools - selects AMB Exhibition in Stuttgart as its first important direct presence since the official start of operations in Europe.

Officially in operations since January 2016, Yamawa Europe has recently introduced the new Products Catalogue 2016-2017 dedicated to the European market and will showcase at AMB a series of news and products focusing on the technology needs of the German industry.

Significant highlights are the **MHRZ** forming taps, for forming threads of medium hardness steel and specifically designed for the automotive industry; The **MHSL** series for medium hardness steel high performance tapping of blind holes; **AXE-HT** taps for high performance tapping of Aluminum Alloy Diecasting; **MC-AD-CT** carbide taps with through coolant for high volume tapping of blind holes in Aluminum Diecasting.

*“The technology excellence of Yamawa products range meets perfectly the philosophy and the requirements of the German metal working industry. – says **Alessandro Sorgato**, CEO, **Yamawa Europe** – With the opportunity represented by an important and well established exhibition such as the AMB, we’ll be involved in a series of meetings that we have set-up to select new qualified partners for the German market and to meet directly with end-users who need the tools to meet their challenges everyday”.*

Yamawa will present also the new **AU** DIN range of universal taps now available up to diameter 20 for both M and MF threads, allowing high performance threading on a broad range of materials, to meet one of the most frequent requirement of the market.

The breadth of Yamawa range will be visually represented at the stand with the showcase of the S0.6 roll tap for micro-threading side by side with the new RE-HT tap for off-shore maintenance of large dimension work-pieces available at the show in size M80

Together with one of the most comprehensive catalogue in the industry with 15000 items and a detailed and rich section dedicated to technical information, Yamawa Europe will introduce for the first time the new technical guides, building on the know-how developed by Yamawa in almost a century of experience in the design and manufacturing of taps, dies and centering tools.
